

Research Presentations
Team Member: Andrea Mordoh

Project Description:

1. Using a *Google Doc*, students will choose a research topic and write 3 questions that they are interested in learning about.
2. After their topic is approved by the teacher through a comment on the *Google Doc*, students will post their topic and questions on their blogs.
3. Students will visit other students' blogs and research the posted questions.
4. They will also use a *Citation Maker* and cite the internet resource for their answer.
5. Students will create a *Google Presentation* (power point) utilizing the information posted on their blog.
6. Finally, they will present their presentation to the class.
